Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application has been examined. Claims 1-12 are pending. No new Claims have been submitted.

Priority

This application claims benefits of priority from US provisional patent application 60/207532 filed May 26, 2000 and 60/225217 filed August 14, 2000.

The effective date of the claims in this application is May 26, 2000.

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2144

Claims 1-12 recite limitations for 'separating a path into a plurality of strips'. The Examiner notes that the claim language may lead to misinterpretation, as the claims do not sufficiently describe what a path is, what a strip is, and how the path and strip are related. The Examiner notes that the Applicant Specifications do not sufficiently describe 'path' and 'strip' respectively. The Examiner notes that there is no tangible embodiment for said path and strip.

Claims 1-12 recite limitations for 'determining a quantized angle'. The Examiner notes that the claim language may lead to misinterpretation, as the claims do not sufficiently describe what a quantized angle is, and the relationship between said quantized angle, the path and the plurality of strips. The Examiner notes that the Applicant Specifications do not sufficiently describe 'quantized angle'. The Examiner notes that there is no tangible embodiment for said quantized angle.

Allowable Subject Matter

Claims 1-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

Examiner's Note: In the case of amending the claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6489956 B1 Deering; Michael F. - computer graphics system that utilizes a super-sampled sample buffer and a programmable sample-to-pixel calculation unit for refreshing the display.

US 6639593 B1 Yhann; Stephan R. - implementing the methods that provide useful resolution-independent representations of the perimeter of a bitmap object.
